1. Title: KANAB MUNICIPAL AIRPORT IMPROVEMENTS

Applicant: Kanab City Corporation

Description: This single year project is to design and rehabilitate the entire aircraft parking apron on the airport. The majority of the apron was last rehabilitated in 1975 and has reached the end of its useful life. Since the last rehabilitation, numerous pavement maintenance projects have been accomplished to extend the life of the pavement until the present time.

Funding:	<u>Amount</u>	<u>Agency</u>	<u>SAI #</u>
	\$ 420,827	FAA	Received 2-19-2010
	\$ 585,000	UDOT	
	<u>\$ 87,148</u>	Local Share	
	\$1,092,975		

Comments: The Federal Aviation Administration (FAA) and Utah Department of Transportation (UDOT) Aeronautics propose to fund a \$1 million apron improvement project at the Kanab Municipal Airport. The entire parking apron will be resurfaced. The airport is a vital transportation link in the region, serving important public safety needs and visitor needs. Regional policies support efforts to maintain and improve municipal airports. (Ken Sizemore)
